The Chief General Manager
(Commercial & RAC)
TS Southern Power Distribution
Company Limited, Corporate Office,
Mint Compound,
Hyderabad.- 500063

Date: 18 -03-2016.

Sir.

Sub:- Submission of Objections/Suggestions – Aggregate Revenue Requirement (ARR) and Tariff proposal for the year 2016-17 – Enumerating & Filing the Oobjections – Request not to approve for increasing the domestic tariff upto 300 Units/Month – Reg.

Ref:- Siasat Urdu daily Newspaper clipping dated: 10-03-2016.

I Mohd. Quasim Ali, Citizen of India and Resident of M.S. Maktha Opp: Raj Bhavan would like to brings the following few lines for your kind consideration.

- 1). The Retail Supply Tariff proposal submitted by the SPDCL before the Honorable Telangana State Electricity Regulatory Commission (TSERC), Hyderabad for the financial year 2016 2017 in the news paper "Siasat Daily" the domestic and Commercial and others are also the categories showing the proposed tariffs.
- the balance categories who are using more than 100 units/month are being charged abnormal. For this proposed tariff rates are applicable to are paying existing huge amounts in the present rates, now they have tol bear another imposition if the proposed rates accepted. These are consumers who come under middle income group families.
- 3). Now I said here that the Telangana Government recently announced before Civic Body Election that the arrears are exempted for the units/month and Water Bill arrears also. Those who are defaulters they are being benefited from the Government instead of getting punishment.

- 4). The rich people are not bothered about the increase of Tariff rates. Only the burden is falling on the innocent and Middle Income group categories who are paying the bills and Taxes regularly. They are not getting any benefits from the State Government or Central Government.
- 5). Further, I submit that the Commercial categories are paying huge amounts in respect of Electricity charges. In this connection I submit that kindly categorize the Commercial shops on the basis of the Load. For example one small shop holder has taken a load 1 KW and another big shop fellow has taken the load above 1 KW. They may be separated in two categories the businessman who are using of 200 Units/Month should belong to one category and those who are using above 200 Units/month should be brought in Second (IInd) category and tariff rates also should be different with different tariff rates.
- 6). I submit that the Delhi AAP government reduced the rates for their consumers by 50% and they are paying the Electricity bills i.e., 50% only. But, here the people of Telangana voted to Power TRS Party with a hope of getting the benefits from Telangana government to all categories. But there is no difference between the previous Government and the present Government in charging all types of taxes/charges.

Hence, I request the competent authority not to permit to increase proposed Tariff Rates in respect of domestic categories, that is those who are using electricity up to 300 Units/month and also to re-categorized on Commercial side as stated in para 5 above to save the Fundamental Rights of small businessman and Citizens of India. Other wise the such acts will shall have negative impact and affect in 2019 Assembly Election. It is my humble request to ponder over that the TRS Government in respect of imposition of all type of taxes/charges will not give any chance to other parties to exploit the vainglorious proposals and recommendations of the TRS Government and shall come in power in 2019 Assembly Elections.

Thanking you,

Street de

Yours Sincerely,

MOHD. QUASIM ALI)
